

Fast Rescue Craft Kits Military

Side 1

The Jason's Cradle® FRC Kits are proven to aid in the safe and speedy recovery of man-overboard victims in the preferred horizontal position. They are currently in service globally with most Navies' and are considered a vital piece of safety equipment. The kits are NATO Stock Coded, SOLAS Approved and guaranteed for 3 years.

'Jason's Cradle®' Quite Simply We Save Lives...

- The FRC kit consists of a Jason's Cradle® with stowage bag and a fixing kit that enables the Cradle to be deployed on both the port and starboard side as required.
- Deployment of the Cradle forms a non-collapsible scoop.
- The FRC approaches the casualty slowly, keeping them on the windward side and the casualty is guided into the Cradle headfirst.
- A strop is pulled to close the loop.
- A co-ordinated and methodical lift takes place and 'rolling' him over the tube into the rescue craft in the medically preferred horizontal position retrieves the casualty.
- Even with very heavy bodies the lift takes just a few seconds due to the Cradle's 2 to 1 mechanical advantage.

Navies worldwide including the following currently use the Jason's Cradle®:

Australia	Belgium	China
Ireland	Denmark	Germany
Netherlands	United States of America	
United Kingdom	Malaysia	France
