

Fully Enclosed Lifeboat Kit

Side 1

The Jason's Cradle® Fully Enclosed Lifeboat Kit (FELBK) is a SOLAS Approved Man-Overboard recovery system that allows the quick and safe recovery of Man-Overboard casualties back onboard the lifeboat. The Jason's Cradle® FELBK is the safest and most universally accepted method of rescuing a casualty from the water. The horizontal recovery position assists in enabling the casualty's blood to remain in the upper torso helping to minimise the potentially fatal effects of Circum Rescue Collapse. The design and construction of the Jason's Cradle® allows a one to one rescue.

**Jason's
Cradle®
- A Real
Life
Saver**

All Jason's Cradle® units carry our manufacturer warranty of 3 years excluding clips, strops, hauling lines, stowage bags and other additional fittings that carry the usual 1 year manufacturer's warranty.

Fully Enclosed Lifeboat Kit

Side 2

Specifically designed to allow swift easy recovery of Man-Overboard casualty back onboard fully enclosed lifeboats. Already in use with cruise companies, offshore support vessels, oil platforms and tanker vessels this piece of equipment is vital to the safety & survival of persons caught in the harsh environments of the sea.

The Jason's Cradle® Fully Enclosed Lifeboat Kit is a proven method of Man-Overboard Recovery helping to eliminate the risks of Circum Rescue Collapse caused by raising casualties in the vertical position.

With Enclosed Lifeboats, the difficulties of retrieval and risk of Circum Rescue Collapse is greater due to the small hatches and confined space that is inherent in the designs. This makes Jason's Cradle® a necessity in providing the casualty with the safest and quickest method of recovery in the preferred horizontal position.

Kit Contents

2MC-JCFEL001 - Jason's Cradle® - 1860mm long by 530mm wide - Stainless Steel A-Frame, Block & Tackle & Bag

2MC-JCFEL002 - Jason's Cradle® - 3000mm long by 530mm wide - Stainless Steel A-Frame, Block & Tackle & Bag

Jason's Cradle Technical Specifications

- ✓ Rungs: - Delrin 100T High Tensile Plastic
- ✓ Centre/End Caps: - Polyethylene LDPE & HDPE
- ✓ 316 Marine Grade Stainless Steel Link Components
- ✓ Stainless Steel Fasteners Used Throughout
- ✓ Fixing Clips Breaking Load 3200kg
- ✓ SOLAS Certification
- ✓ 316 Stainless Steel Stanchion Kit
- ✓ Tensile tested in excess of one metric tonne (2,205lbs)
