

# Jason's Cradle®

Man Overboard Solutions

This Jason's Cradle® range is specifically devised for the leisure boat market. It's design promotes speedy recovery of people from the water in the all important horizontal position, the modern marine world's recommended and recognised method for the retrieval of a MOB (Man Over Board) survivor.

Using Jason's Cradle® as your preferred MOB recovery system allows you to retrieve those who are unable to assist themselves due to fatigue, injury or the inaccessibility of a high freeboard.

The **Dolphin** is 530mm (21") wide and 2.43m (95") long and is suitable for most vessels with up to 2m freeboard

The **Marlin** is 530mm (21") wide and 2m (78") long and is suitable for all RIBs and small vessels up to 1m freeboard and up to 5m in length

The **Stingray** is 710mm (28") wide and 2m (78") long and is suitable for all RIBs and small vessels up to 1m freeboard and over 5m in length

The Jason's Cradle® leisure range comes to the market with the same quality, strength and reliability of the already established Jason's Cradle® commercial MOB systems which are renowned worldwide for their use in every military, commercial, rescue and leisure area within the marine sector.

**Jason's Cradle® MOB systems** continue to be the most efficient solution to MOB recovery, embarkation/ disembarkation and evacuation system in the world.

- Single person recovery system
- Rigid loop provides easy access
- Easily deployable in all weather conditions (unaffected by wind as with fabric systems)
- Boarding Ladder
- Compact storage bag with quick release

Man Overboard Solutions

### MOB Recovery using the Jason's Cradle®

- The Jason's Cradle is simply fixed to the deck or rail to enable deployment within seconds and can be easily rolled up for stowage
- A Strop is pulled to form a non-collapsible scoop and the casualty is guided into the cradle
- A co-ordinated & methodical lift takes place & the casualty is retrieved by rolling onto the deck in the medically preferred horizontal position

- Easy to fit adjustable fixing strop
- Fixing pouch provides tidy stowage and prevents hull damage
- Stowage bag rail attachment
  - mounted outboard saves deck space
  - swing inboard for easy deployment

- Clips attach to fixing points on vessel
- Stowed inboard in bag attached to fixing points ready for deployment
