

## FIXING SUGGESTIONS FOR JASON'S CRADLE®

### JASON'S CRADLE® GENERAL FIXING POINTS

The preferred fixing point for Jason's Cradle® is outboard of the vessel so that the cradle is able to hang down freely.

The Jason's Cradle® can then be used as a dual purpose Man Overboard Recovery System and Scramble Net / Ladder without exerting unnecessary forces on fixing points and clips.

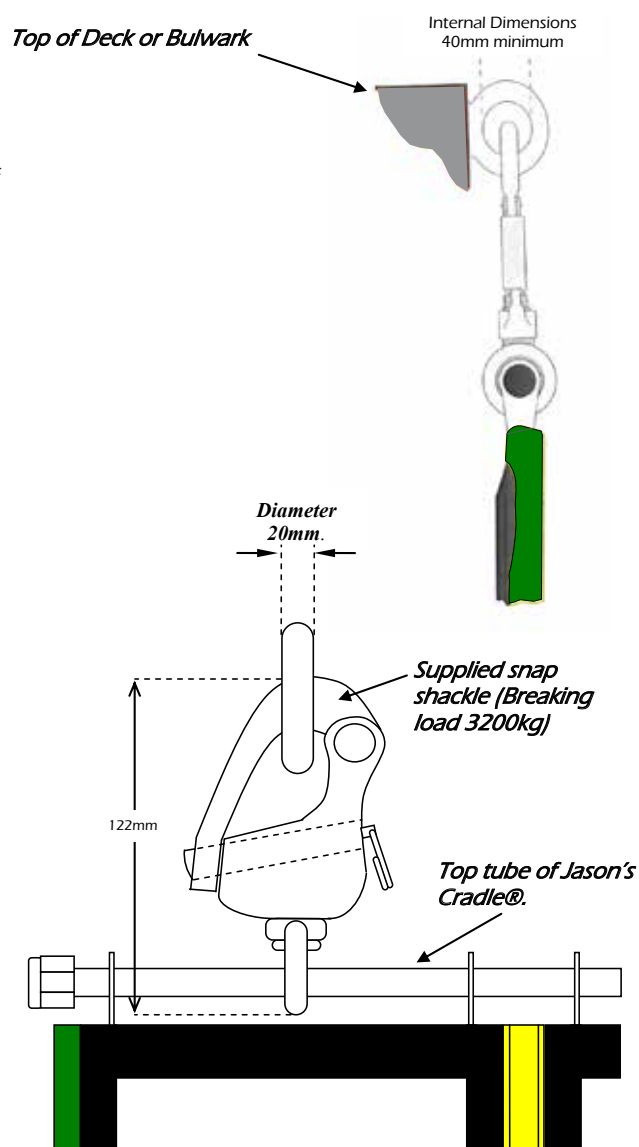

It is paramount that the Eye Bolts or Eye pads are fixed secure and rigid so that no twisting can occur.

If you require further information regarding fixing positions for your Jason's Cradle®, then please do not hesitate to contact our Technical Department.
