

STRETCHER RECOVERY SYSTEM (MORS) MILITARY

The Jason's Cradle® Recovery Stretcher is the safest and most universally accepted method of rescuing a casualty from the water.

JASON'S CRADLE® STRETCHER

Casualty Recovery • Body Recovery • Diver Support

The horizontal recovery position assists in enabling the casualty's blood to remain in the upper torso helping to minimise the potentially fatal effects of Circum Rescue Collapse. The design and construction of the Jason's Cradle® Recovery Stretcher gives it a two-person lift capability. The Jason's Cradle® Recovery Stretcher, often referred to as MORS (Man Overboard Recovery Stretcher) is in use with militaries around the world.

BENEFITS OF THE JASON'S CRADLE® STRETCHER

- Speed and ease of deployment from high vessel freeboards.
- The basket like format enables easy access.
- Increase of efficiency and comfort levels of crews.
- The Casualty is in a full horizontal position reducing circum-rescue collapse.
- 2-person recovery allows for rescue swimmers to be recovered with the casualty.
